For the 3 credit points you should **participate the whole days** and **actively take part in the discussions** on philosophy of science.

If you get ill and miss any of the occasions with philosophy of science you will have to write a short essay about the topic discussed.

For the philosophy of science you will also have to read the textbook (Okasha, *Philosophy of Science*), which is the basis for much of the discussion. This means that you have to start reading before the course. Registered participants will get a free copy of the book a couple of weeks before the course starts.
